PRODUCT SPOTLIGHT

MOBILE-OPTIMIZED

On the frontend, all information can be efficiently accessed through an attractive interface that fits with the overall design of their main website.

SIMPLE NAVIGATION

Products are easily searchable by brand, type, variety, nutritional data, and availability.

INGREDIENTS AND NUTRITION FACTS FOR BRAND NAME FOODS

RocketBuild developed an application to easily search, sort, and filter their food products database with a CMS for administrators to manage the products that display on the site.

The food products database provides an infrastructure where all information can be updated, stored, and tracked by the Aunt Millie's team.

Searching and finding products is easy with a myriad of options to drill down into product data based on key information that users are looking for.

All product data is quickly accessible. Users can toggle between ingredients lists and nutrition facts.
